

Houghton County Road Commission  
Flood Recovery Update  
September 25, 2018

The Houghton County Road Commission (HCRC) would like to thank everyone for their patience as we continue to recovery/repair the road network.

To date the HCRC has spent over \$2.7 million in repairs. Several large box culverts installations should be completed by the end of this week. These locations include Woodside Road, Cloverland Road, Pontiac Road and Lower Worham Road. Cemetery Road Culvert should be completed in the next few weeks.

In addition several projects have recently been bid on the HCRC's Federal Aid system. These projects are as follows:

Project	Low Bidder	Bid Amount
Airport Park Road (M-26 to Hilltop Road)	Bacco Construction	\$ 716,831.75
Salo Road (Box Culvert over Lily Creek)	MJO Contracting	\$ 602,356.52
Emergency Relief project various locations	Bacco Construction	\$1,851,442.25
Houghton Canal Road (Box Culvert over Coles Creek)	FA Industrial Services	\$1,156,211.57
Houghton Canal Road (Box Culvert over Schlot Creek)	Moyle Construction	\$1,367,823.00
Forsman Road (Box over Gooseneck Creek)	Bacco Construction	\$ 601,992.90
Liminga Road (Box Culvert over Schlot Creek)	Bacco Construction	\$ 521,151.50
Houghton Canal Road (Bank Stabilization)	B&B Contracting	\$2,965,355.00
Total Federal Aid bids to date		\$9,783,144.49

This Thursday the HCRC will be receiving bids to install box culverts on Dover Road and Sawmill Road.

The above roads are scheduled to be open to traffic by the beginning of December. Some of the projects will not be entirely completed until June of 2019.

We are currently working with Legislators to secure funding to help pay the \$5 million matching funds required to complete all the repairs from the Father's Day Flood event.

Unfortunately there will be several roadways that will not be repaired until next summer. Please be aware of the damaged roadways and drive in a safe manner around them. Once again thank you for your patience and we continue to recover/repair the roadways.
